

## REMARKS

The present Amendment is supplemental to the Amendment submitted on May 12, 2003. Claims 1-24 are presented for examination, of which claims 1, 8, 9, 20, 23, and 24 are in independent form. Claims 3, 4, 8, 11, 12, 23, and 24 have been amended as to matters of form. The specification has been amended to correct errors in transcriptions. Favorable reconsideration is requested.

Applicant in the Remarks section, on page 11, lines 1-5, of the Amendment submitted on May 12, 2003, inaccurately characterized the aspect of the present invention as allowing image data of a time-lapse sequence to be recorded from a fixed viewing position and direction. In fact, the present invention, as respectively set out in independent claims 1, 8, 9, 20, 23, and 24, allows each image to be recorded from a different viewing position and direction.

Applicant submits that claims 1-24 are believed patentable for the reasons discussed above and as set forth in the Remarks section of the Amendment filed on May 12, 2003.

Applicant respectfully request favorable consideration and early passage to issue of the present application.

Applicant's undersigned attorney may be reached in our New York office by telephone at (212) 218-2100. All correspondence should continue to be directed to our below listed address.

Respectfully submitted,
